

# Do you have a proven strategy to claim your share of the \$50 billionand-growing cardiology market?

By 2035, nearly 45% of Americans are expected to have some form of cardiovascular disease. The rate of peripheral artery disease (PAD) is increasing worldwide, increasingly among people under age 65. Knock-on effects of the pandemic continue to emerge, with post- and long-COVID complications like postural orthostatic tachycardia syndrome, myocarditis, and cardiovascular autonomic dysfunction on the rise.

Service line growth can be an uphill climb when consumers put off screenings and deprioritize their health. But integrated campaigns paired with health risk assessments (HRAs) provide the breakthrough experience healthcare marketers need to drive predictable, profitable service line growth. Media campaigns alone produce too many unqualified leads, and HRAs decoupled from campaigns lack volume. But bring them together, and you get highly-qualified, high-intent leads for unparalleled patient acquisition.

Unlock clients see an average reduction in cost per acquisition of 48% when integrating HRAs with SEM campaigns.

## **Cardiology consumers: Meet Adara**

As a type 2 diabetic, Adara, 60, takes medications to manage her blood sugar, cholesterol, and blood pressure. She has struggled to manage her

weight since menopause, which has a negative impact on her quality of life and cardiac vitals. She's worried about her chances of having a heart attack among other health concerns.

#### Likelihood to:

- Provide a complete risk profile: 36%
- Click an HRA CTA: 70%
- Become a qualified lead: 40%

## How HRAs drive conversion through the marketing funnel

Expertly targeted integrated media campaigns identify consumers in their moment of need.

Hyper-personalized CTAs guide participants to appropriate care and inspire action.

Automated downstream nurturing powered by our HRA console converts leads to encounters.

Ongoing care and lifestyle recommendations, fueled by first-party data, foster lasting patient relationships.
